Basics of Wine Characteristics

Acidity

Tingling sensation that focuses on the front and sides of your tongue. Feels like pop rocks.
If you rub your tongue to the roof of your mouth, it feels gravelly.
Your mouth feels wet like you bit into an apple

Alcohol

Taste bolder and more oily.
Lower alcohol tend to taste lighter-bodied
Most wines range between 11-13% ABV

Sweetness

Tingling sensation on the tip of your tongue.
Slight oily sensation in the middle of your tongue that lingers.
Wine has a higher viscosity; wine tears on the side of the glass slowly.

Body

Body is the result of many factors - from wine variety, where it's from, vintage, alcohol level, and how it's made.
Body is a snapshot of the overall impression of a wine.
